Retrieval Notes

Retrieval-augmented generation grounds an answer in source passages. Users want to see exactly where the cited sentence lives on the page, but the text layer splits every line into separate items and drops the space at the break.

Mixed **bold** words in one line.

Reviewers said “provenance matters” and trust grows – slowly.

Approximate alignment tolerates small typing mistakes in a quoted sentence, so the highlight still lands on the right line even when a model rewrites a word or two.

Left column first line
left column second line

Right column first line
right column second line

Rotated three needs a viewport transform
Second rotated line of text
